

Google Classroom

Desktop Landing Page

UI/UX Case Study

What is Google Classroom?

Google Classroom is a free blended learning platform developed by Google for educational institutions that aims to simplify creating, distributing, and grading assignments. The primary purpose of Google Classroom is to streamline the process of sharing files between teachers and students.

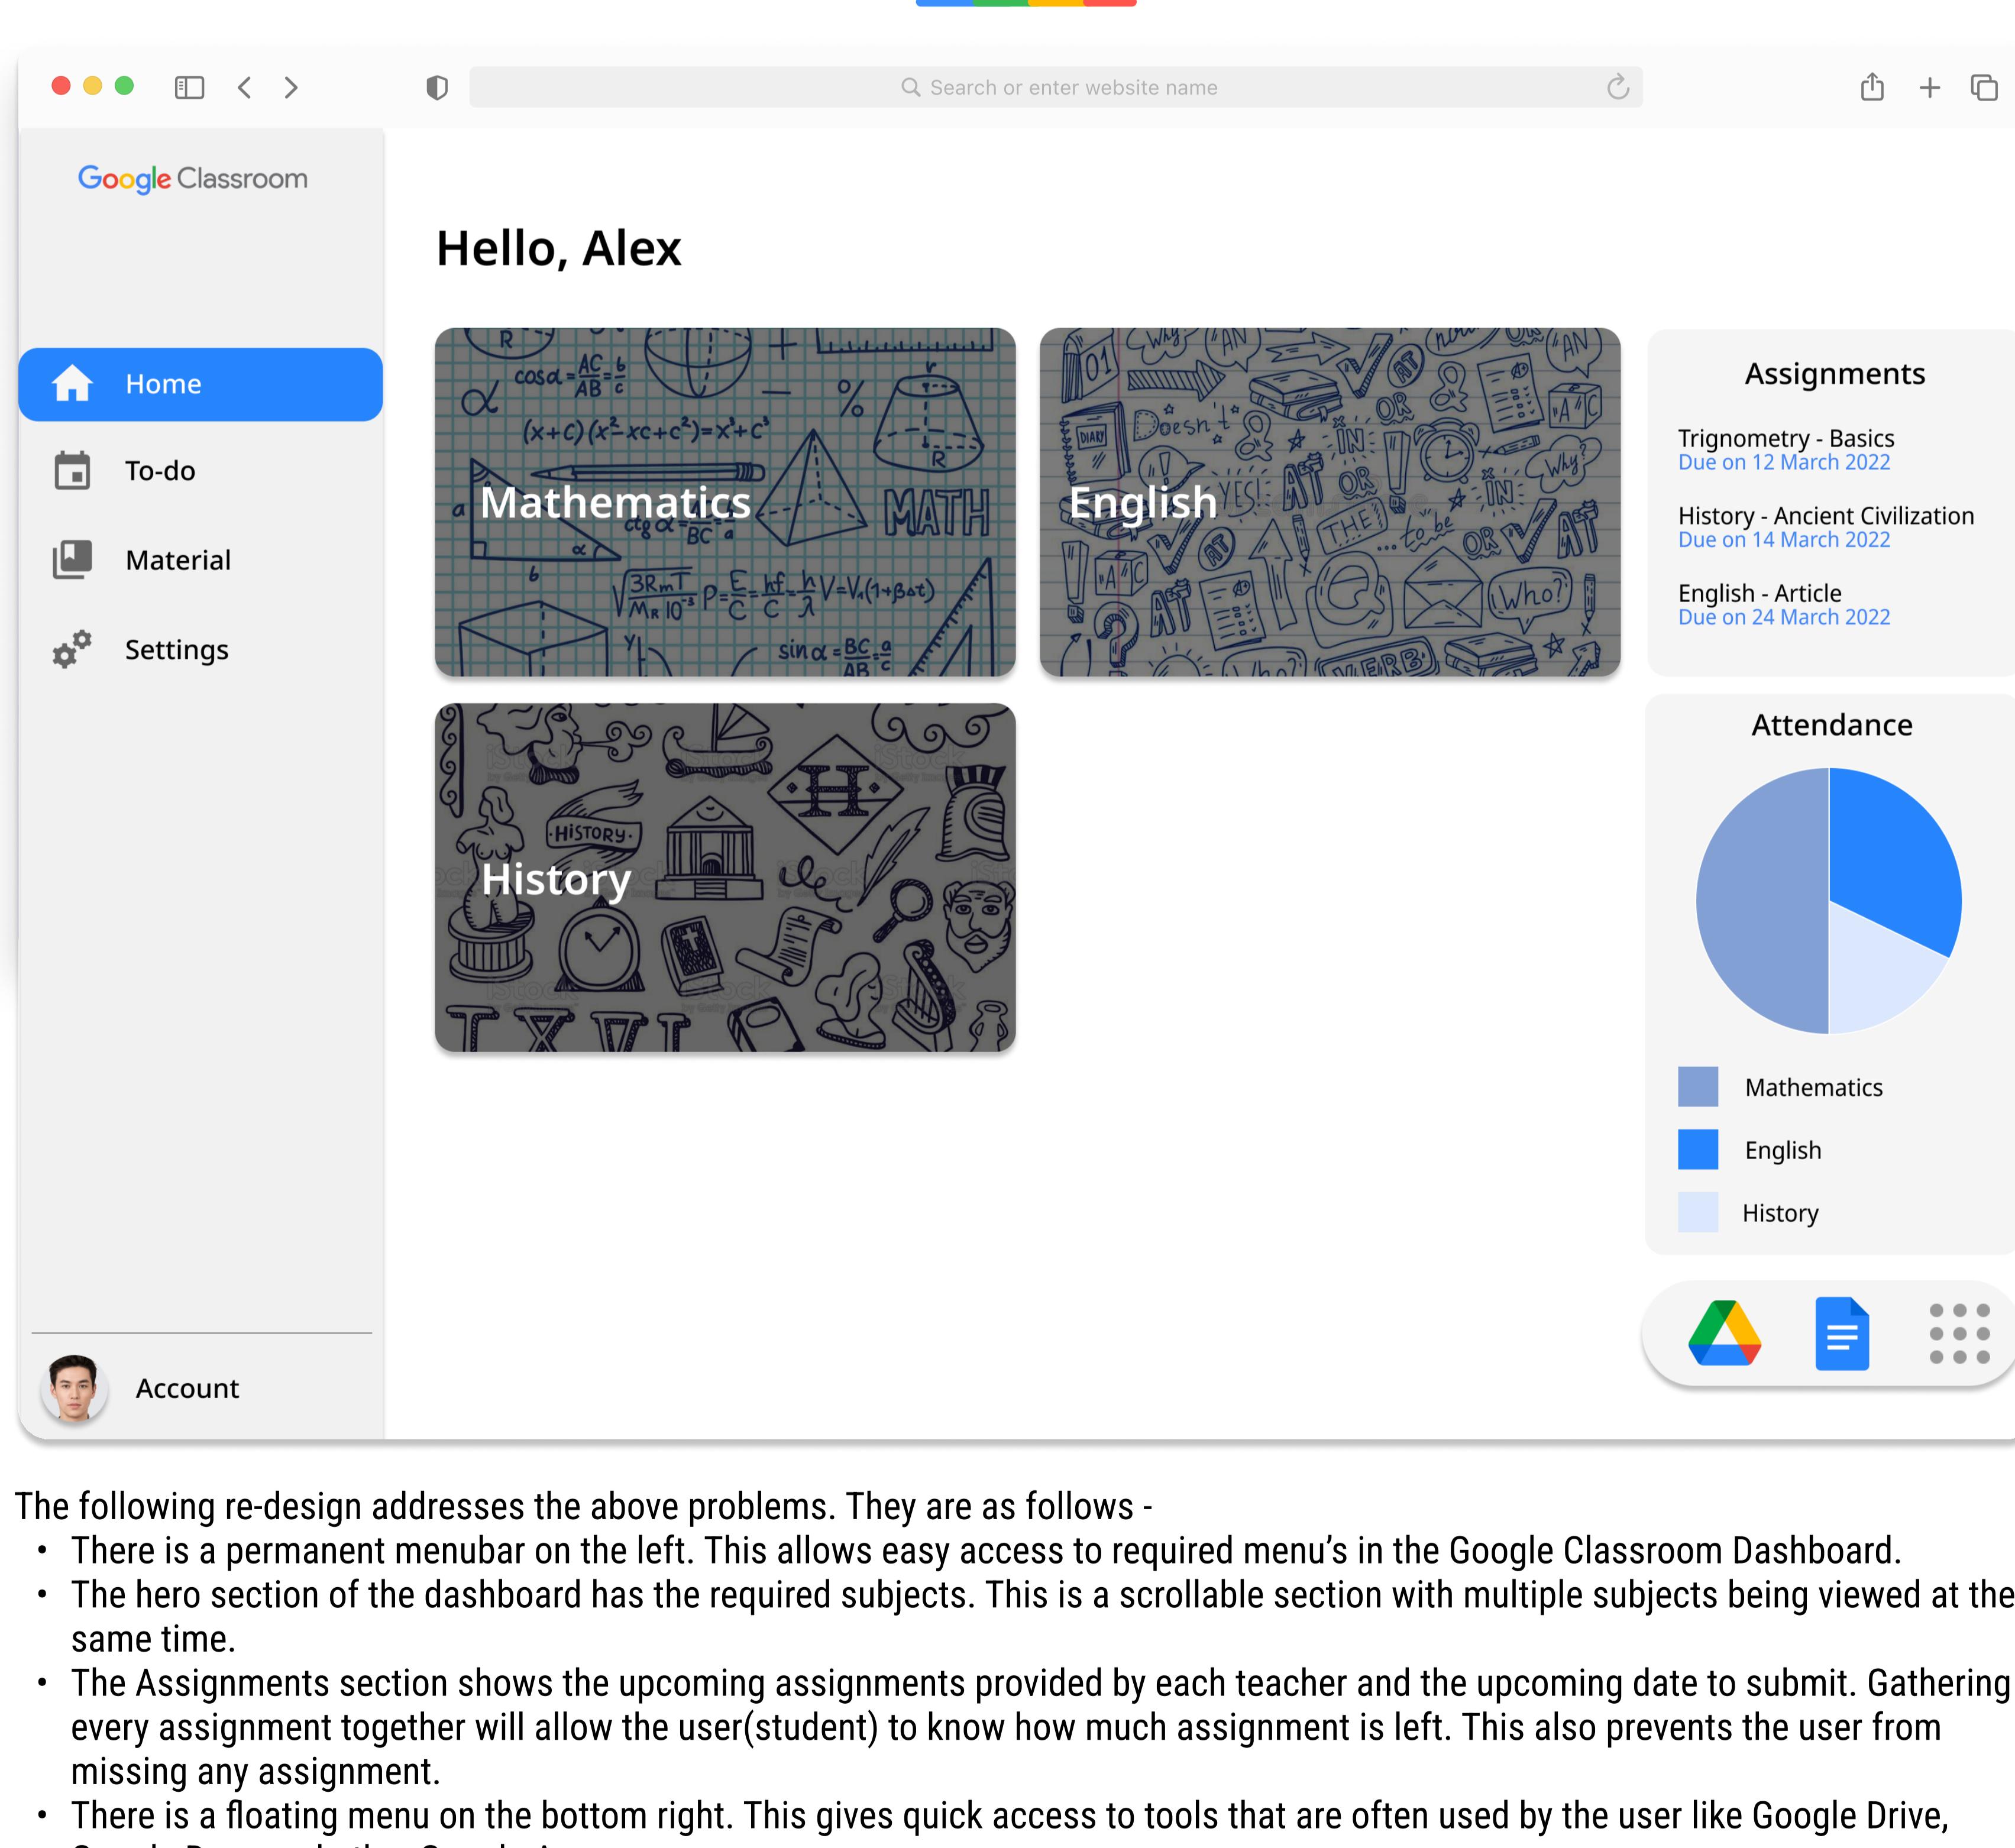

The current Desktop Google Classroom Landing Page UI ,while functional is very old.

There is a lot of unused space present on the right of the UI. This behaves the same on different responsive version of the websites.

There are uneven margins present on both sides of the screen. This results in a boring UI that simply lacks user engagement. Google Classroom fails to initiate student and teachers to actively use the platform. The current UI also lacks the access to basic tools like Google Drive, Google Docs, Google Slides etc. This page also shows very limited information Subjects the user has.

- Subjects the user has.
- The assignment that the user is given is present inside the different cards associated to a subject.
- The following also does not show any form of progress in terms of metrics.

The following changes are suggested in the following

The following re-design addresses the above problems. They are as follows -

- There is a permanent menubar on the left. This allows easy access to required menu's in the Google Classroom Dashboard.
- The hero section of the dashboard has the required subjects. This is a scrollable section with multiple subjects being viewed at the same time.
- The Assignments section shows the upcoming assignments provided by each teacher and the upcoming date to submit. Gathering every assignment together will allow the user(student) to know how much assignment is left. This also prevents the user from missing any assignment.
- There is a floating menu on the bottom right. This gives quick access to tools that are often used by the user like Google Drive, Google Docs and other Google Apps.
- There is also a attendance section on the bottom right section of the hero page. This shows a form progress using metrics.
